

Docker Desktopi installimine

Eeldused

Samm 1 - Lae alla Docker Desktop

Samm 2 - Installimine

Samm 3 - WSL integratsioon

Samm 4 - Kontrollimine

Eeldused

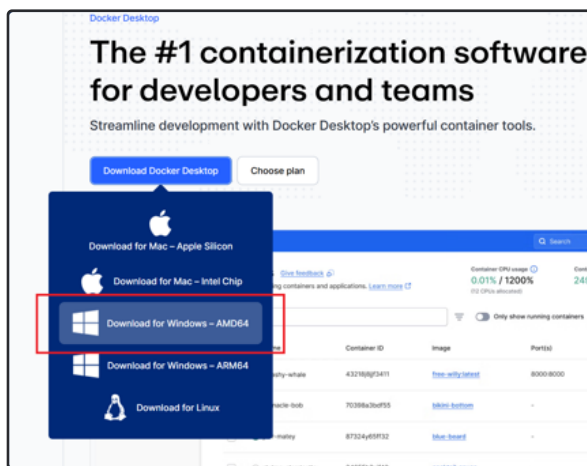

- Windows 10 või 11
 - WSL 2 on aktiveeritud
-

Samm 1 - Lae alla Docker Desktop

Mine Docker ametlikule lehele ja lae alla installer:

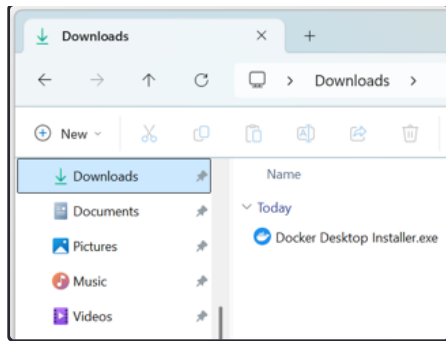

<https://www.docker.com/products/docker-desktop/>

Vali **Download for Windows**.

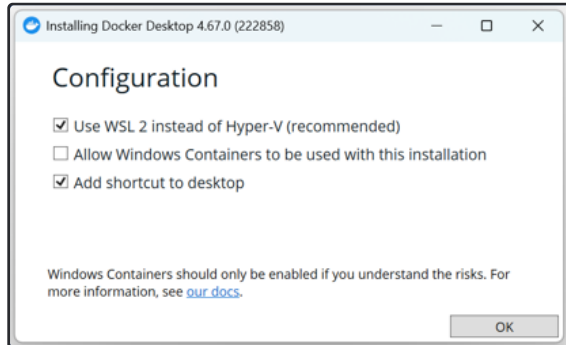

Samm 2 - Installimine

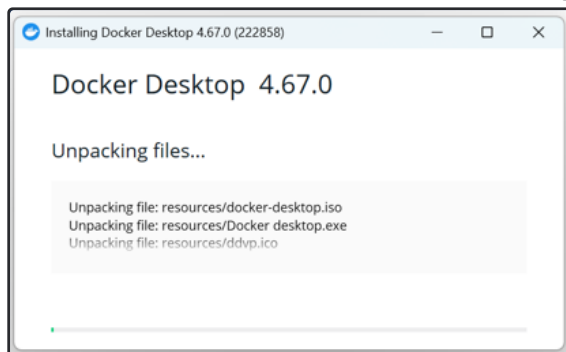

1. Käivita allalaaditud `Docker Desktop Installer.exe`

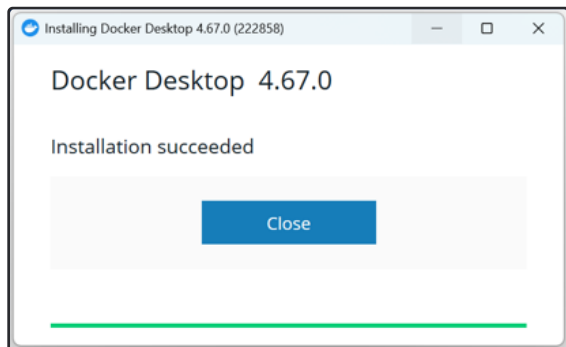

2. Installimisel vali **Use WSL 2 instead of Hyper-V**

3. Mine võta kohvi, see võtab natukene aega ☺

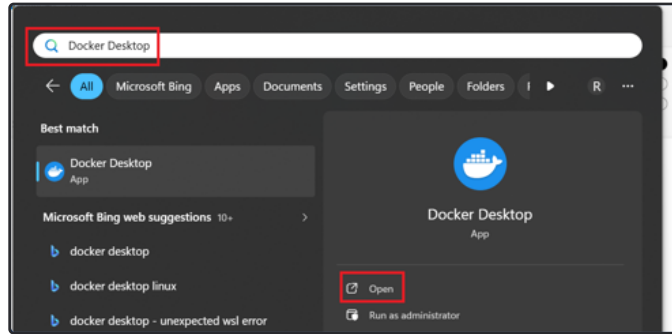

4. Pärast installimist taaskäivita arvuti

Samm 3 - WSL integratsioon

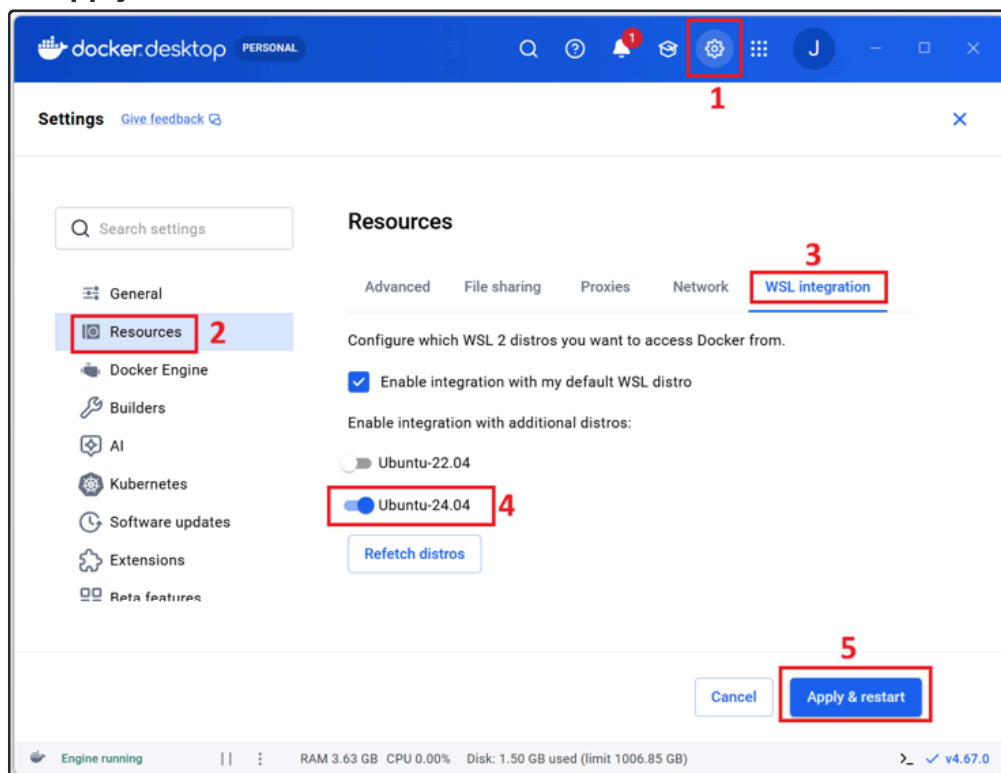

1. Avage Docker Desktop

2. Logi sisse (näiteks Googl kontoga)

3. Mine:

- **Settings**
- **Resources**
- **WSL Integration**
- **Apply & Restart**
- Lülita sisse integratsioon soovitud WSL distributsioonidega (nt **Ubuntu 24.04**)
- **Apply & Restart**

Samm 4 - Kontrollimine

Ava WSL terminal ja kontrolli:

```
1 | docker --version
```
